1 Introduction

This vignette describes related resources and materials useful for teaching statistics with a focus on modeling and computation.

2 Package Vignettes

The `mosaic` package includes a number of vignettes including vignettes discussing

- a minimal set of R commands for use in Introductory Statistics and why it is important to keep the set of commands small;
- the R commands needed for all the basic statistical procedures in an Intro Stats course;
- strategies for teaching statistics using R;
- resampling methods in R; and
- using R in calculus.

3 Textbook Related

Statistical Modeling: A Fresh Approach, 2nd edition (D T Kaplan) is an introduction to statistics embracing a modeling approach and employing resampling methods. The **mosaic** package is used throughout. <http://www.mosaic-web.org/StatisticalModeling>.

Foundations and Applications of Statistics: An Introduction Using R (R Pruim) is an R-infused probability and mathematical statistics text that emphasizes connections between probability and statistics. The book predates the **mosaic** package, much of the code originally in the **fastR** package has been moved into the **mosaic** package. <http://www.ams.org/publications/authors/books/postpub/amstext-13>.

The Statistical Sleuth in R (N Horton) available at <http://www.math.smith.edu/~nhorton/sleuth3> describes how to undertake analyses in R for the examples in the first 13 chapters of the Third Edition of the *Statistical Sleuth: A Course in Methods of Data Analysis* (2013), the excellent text by Fred Ramsey and Dan Schafer.

Introduction to the Practice of Statistics in R (N Horton) available at <http://www.math.smith.edu/~nhorton/ips6e>, describes how to undertake analyses in R that are introduced as examples in the first chapters of the Sixth Edition of *Introduction to the Practice of Statistics* (2007), the excellent text by David Moore, George McCabe and Bruce Craig.

Statistics: Unlocking the Power of Data (Lock, Lock, Lock, Lock, and Lock) is a recent introductory statistics textbook that embraces a resampling approach. The **Lock5Data** package contains all of the data in the book. Additional information about the book and the approach used there can be found at <http://lock5stat.com>
