1 Introduction

This vignette describes related resources and materials useful for teaching statistics with a focus on modeling and computation.

2 Package Vignettes

The mosaic package includes a number of vignettes including vignettes discussing

- a minimal set of R commands for use in Introductory Statistics and why it is important to keep the set of commands small;
- the R commands needed for all the basic statistical procedures in an Intro Stats course;
- strategies for teaching statistics using R;
- resampling methods in R; and
- using R in calculus.

3 Textbook Related

- Statistical Modeling: A Fresh Approach, 2nd edition (D T Kaplan) is an introduction to statistics embracing a modeling approach and employing resampling methods. The mosaic package is used throughout. http://www.mosaic-web.org/StatisticalModeling.
- Foundations and Applications of Statistics: An Introduction Using R (R Pruim) is an R-infused probability and mathematical statistics text that emphasizes connections between probability and statistics. The book predates the mosaic package, much of the code originally in the fastR package has been moved into the mosaic package. http://www.ams.org/publications/authors/books/postpub/amstext-13.
- The Statistical Sleuth in R (N Horton) available at http://www.math.smith.edu/~nhorton/sleuth3 is describes how to undertake analyses in R for the examples in the first 13 chapters of the Third Edition of the Statistical Sleuth: A Course in Methods of Data Analysis (2013), the excellent text by Fred Ramsey and Dan Schafer.
- Introduction to the Practice of Statistics in R (N Horton) available at http://www.math.smith.edu/~nhorton/ips6e, describes how to undertake analyses in R that are introduced as examples in the first chapters of the Sixth Edition of Introduction to the Practice of Statistics (2007), the excellent text by David Moore, George McCabe and Bruce Craig.
- Statistics: Unlocking the Power of Data (Lock, Lock, Lock, Lock, and Lock) is a recent introductory statistics textbook that embraces a resampling approach. The Lock5Data package contains all of the data in the book. Additional information about the book and the approach used there can be found at http://lock5stat.com
