# Chapter 1

This is a Chapter

If we use article style instead of report style then the top level would be sections. Not sure which is better. Depends on the length of the vignette, I'm guessing.

1.1 This is a section

1.1.1 This is a subsection

Here is some R code

```
> densityplot(~age | sex, groups = substance, data = HELPrct)
```

1.1.2 Another subsection

More stuff could go here.
